

## River Basins Currently with Advisories

Information in addition to this advisory may be found at:

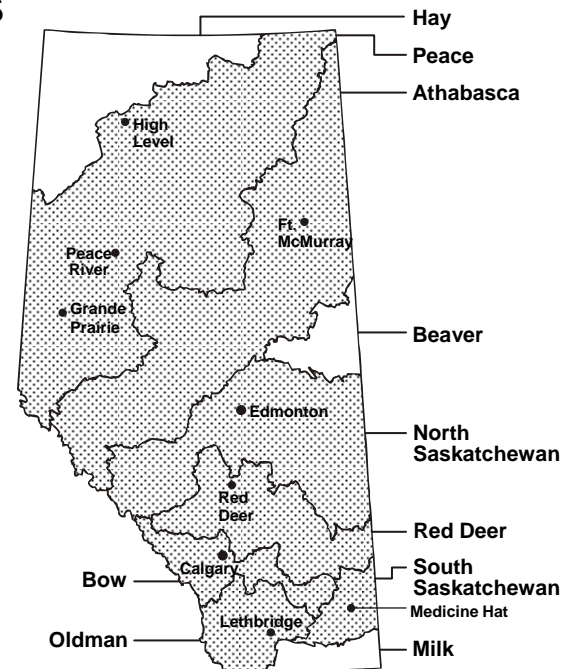

<http://www.environment.alberta.ca/forecasting/forecasterscomments>

<http://www.environment.alberta.ca/apps/basins>

**High Streamflow Advisory** – Stream levels are rising or expected to rise rapidly and no major flooding is expected. Minor flooding in low-lying areas is possible. Anyone situated close to the streams affected is advised to be cautious of the rising levels.

**Flood Watch** – Stream levels are rising and will approach or may exceed bank full. Flooding of areas adjacent to these streams may occur. Anyone situated close to the river is advised to take appropriate precautionary measures.

**Flood Warning** – Rising stream levels will result in flooding of areas adjacent to the streams affected. Anyone situated close to the river should take appropriate measures to avoid flood damage.

## Streamflow Advisory Overview for Alberta

Advisories apply to streams and their tributaries unless otherwise noted.

- The storm system that began yesterday has brought rain to central and southern portions of the Province, and especially along the Eastern Slopes. The Upper Athabasca River basin and the foothills region west of Calgary have received 35 mm with the other areas receiving up to 20 mm.
- The system is forecast to bring an additional 30 – 40 mm along the Eastern Slopes into Sunday morning with higher amounts in localized areas.
- River conditions are being monitored and updates will be issued as required.
